

Veldrin Yard field survey

Survey date: 2027-02-23

Synthetic calibration data - one recorded survey.

Each row describes one site. Tray counts are whole trays.

The sample mass is measured in kilograms (kg).

Site		Accepted trays		Rejected trays		Sample mass (kg)
Teral		18		0		31.6
Luvon		29		3		26.9

Accepted and rejected trays are separate counts.

Sample mass is independent of the number of trays.

The report contains no outdoor temperature measurements.
